WISH

Sector Specific Customizations

Bill of Materials

The BOM is a list of all materials (either bought or made) and operations that go into a finished product or sub-Item.

Workstation

Workstation stores information regarding the place where the workstation operations is carried out

Operation

Stores a list of all Manufacturing Operations, its description and the Default Workstation for the Operation

Work Orders

A Work Order is a document that is given to the manufacturing shop floor by the Production Planner as a signal to produce a certain quantity of a certain Item.

Item Alternative

If a raw material defined in the BOM is not available during the production process then their respective available alternative item used to complete the production process.

Sub-Contracting

Subcontracting is a type of job contract that seeks to outsource certain types of work to other companies.

BOM Comparison Tool

Using BOM Comparison Tool, you can compare two BOMs and see what changed between their iterations.

Capacity Planning

Capacity Planning functionality helps you in tracking production jobs allocated on each Workstation.

Open Work Orders

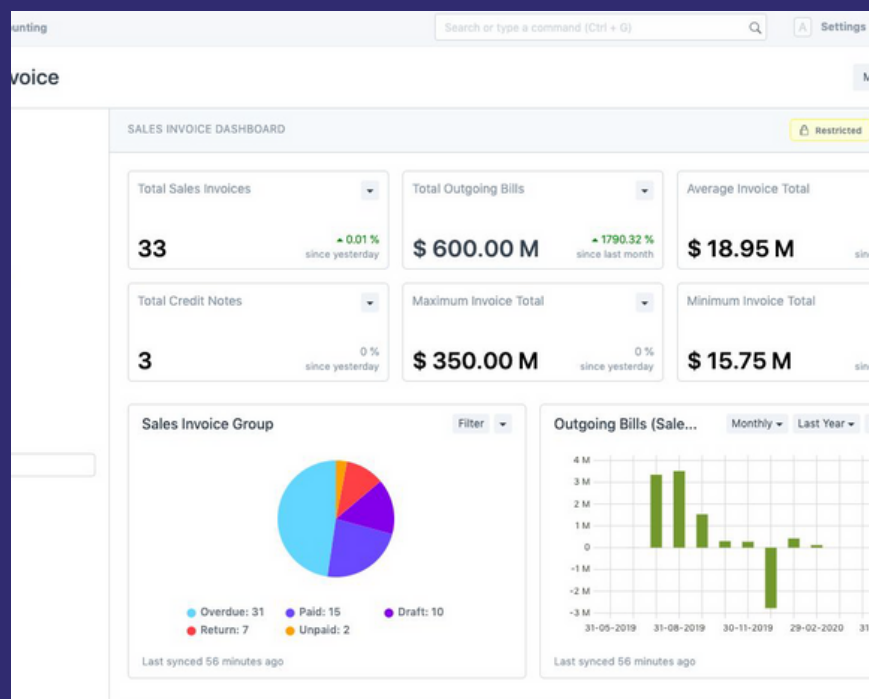

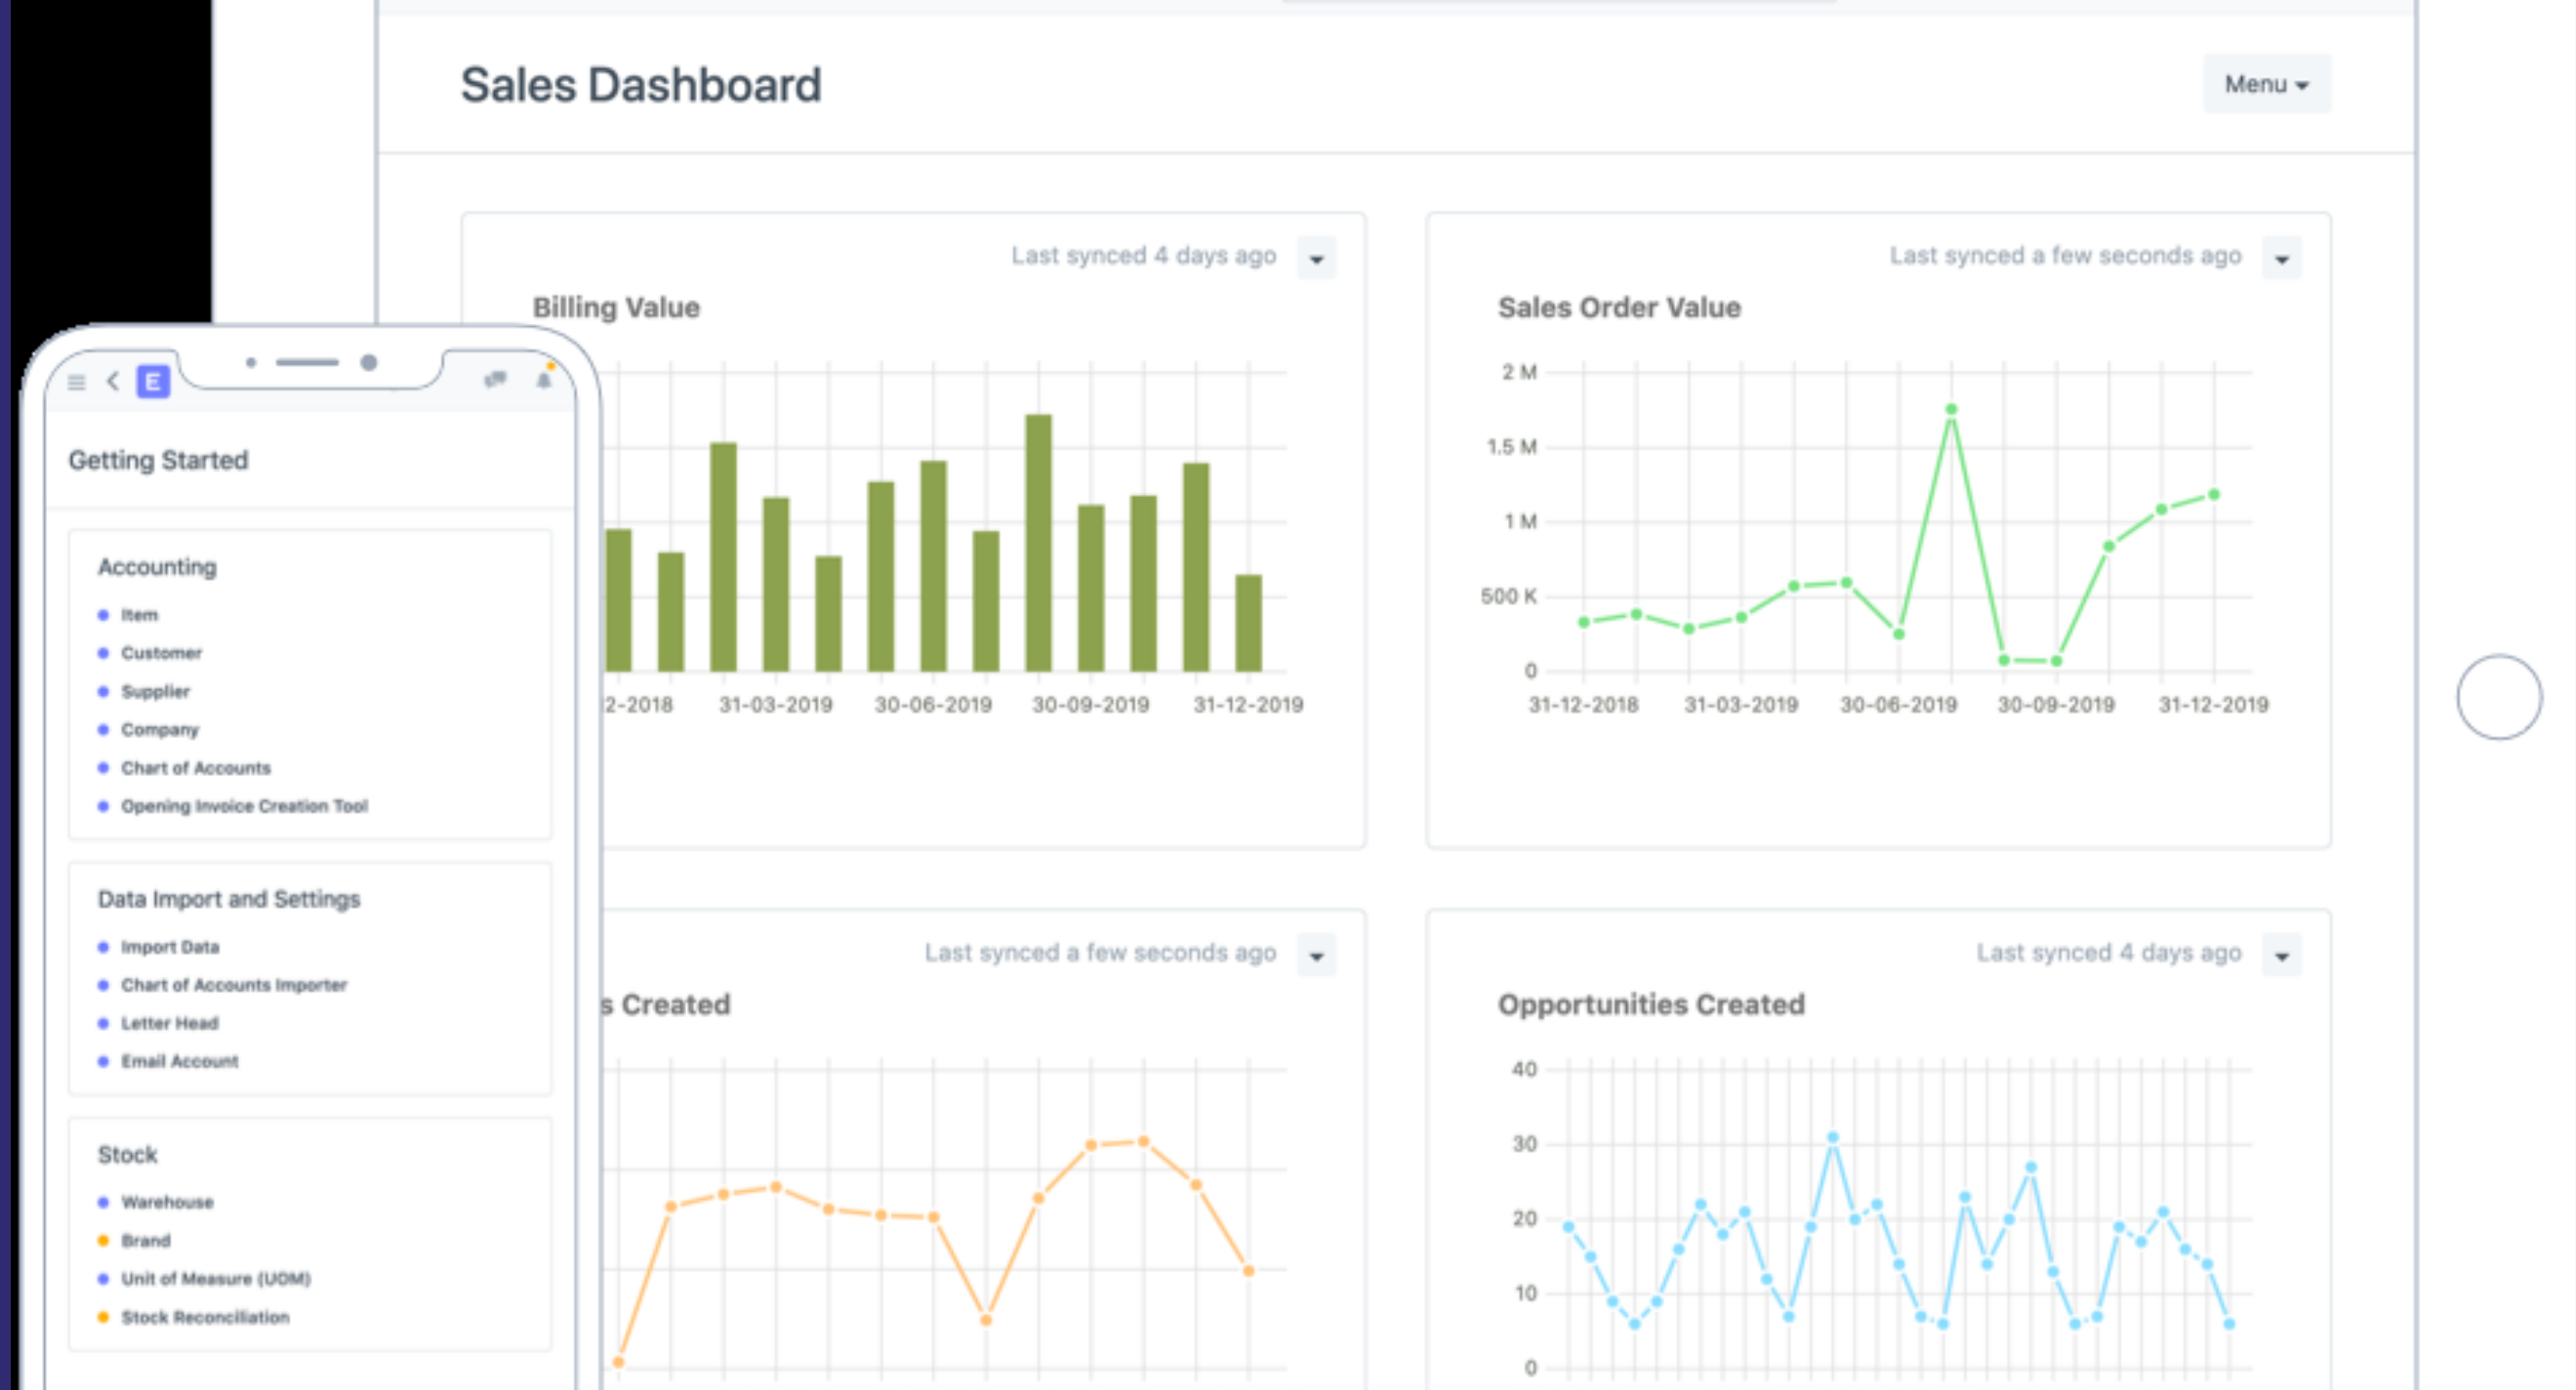

We can easily identify the progress of manufacturing of certain items in our organizations using Open Work Orders feature

WISH Manufacturing Sector Specific Modules

ERP is best fit for your business

System at a Glance
